

Electronic Locks

Hotels rate Security as one of the most important issues facing the industry, and electronic locking systems are a highly effective tool to consider. These not only provide increased security, but are also a way to gather metrics on entries, housekeeping productivity, locking alerts and security detail reports. Electronic locking systems also yield a Return on Investment (ROI) that results from reduced key replacement cost, labor savings and, in some cases, reduced insurance costs. O'Neal Consultants guides you through all types of electronic locking systems to see which best fit your requirements.

O'Neal Consultants' services include developing Electronic Locks Request for Proposal (RFP) and managing the procurement process, so that you have our expert supervision regarding proposal comparisons, contract documents, installation monitoring, and final inspection. In addition, O'Neal Consultants is available for existing systems reviews and consulting.

O'Neal Consultants' Outstanding Accomplishments Speak for Themselves:
